

October 12, 2022

Dear Customers,

Europastry is authorizing blanket shelf-life extensions for Europastry Dots products (including Original Dots, Filled Dots, Mini Dots, and PopDots) as follows:

- **Shelf-life may be extended 3 months from original Best Before date printed on case label.**

Europastry's quality and performance guarantee is through the original "Best Before" date. There is no food safety risk associated with extending shelf life for product maintained under indicated frozen conditions, however, some quality loss may occur when shelf life is extended. Credit will not be issued for loss in quality.

This blanket authorization is valid for Best Before dates up to June 1, 2023. If Europastry decides to continue offering a blanket authorization, we will provide a new authorization letter.

Regards,

A handwritten signature in blue ink that reads "Jonathan Goldberg".
